

# Side Channel Blower

Vacuum/Pressure Operation, single-stage

## Technical Features

**Maintenance-free** through external permanently greased bearings, non-contacting impellers and fan-cooled motors

**Environmentally safe** through oil-free compression, low energy consumption and low noise level

**User-friendly** through robust yet lightweight construction of all sizes due to die cast aluminum, through vertical and horizontal mounting position and suited for variable speed control

**Worldwide usable** through 50/60Hz wide voltage range motors with insulation class F and type of protection IP55, as well as built-in overheat protection and CE, UL and CSA certification

**Customized** for your specific needs and applications

## **ASC-Series,**

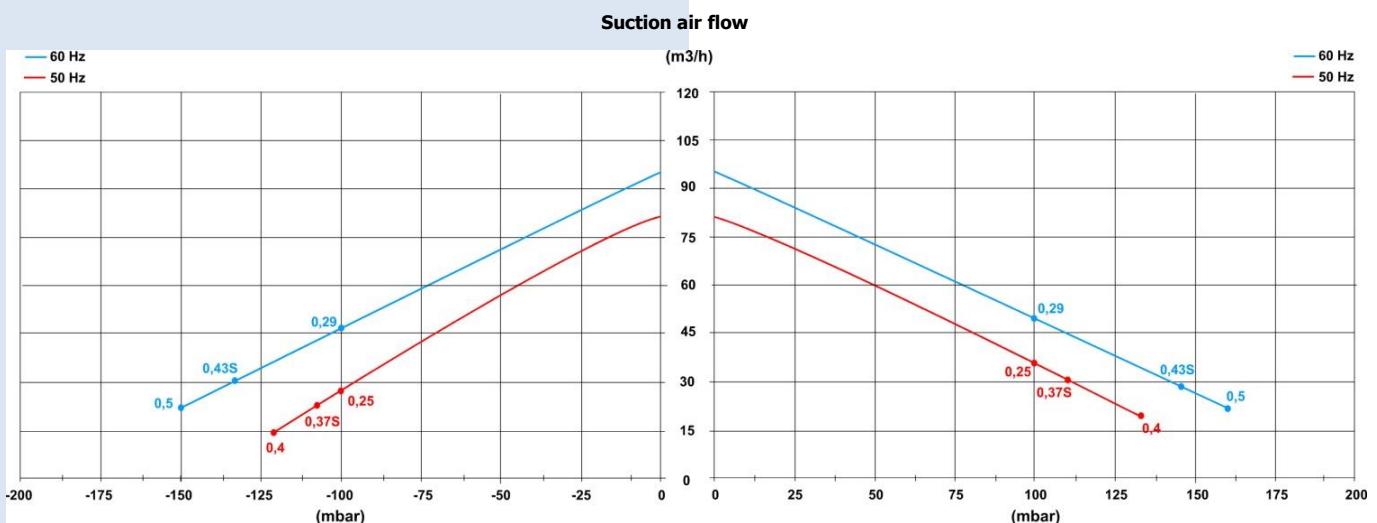

### ASC0080-1M

**AIRTECH ASC** side channel blowers are dynamic blowers that transfer kinetic energy to the medium agent by contactless rotating impellers. The gas is drawn in through a built-in silencer and then the energy transfer is taking place repeatedly in the blower housing. At the discharge side the gas is wiped off at the interrupter and discharged through a second built-in silencer. The energy transfer is achieved in single-stage version as well as two-stage version with two separate impellers for higher differential pressures.

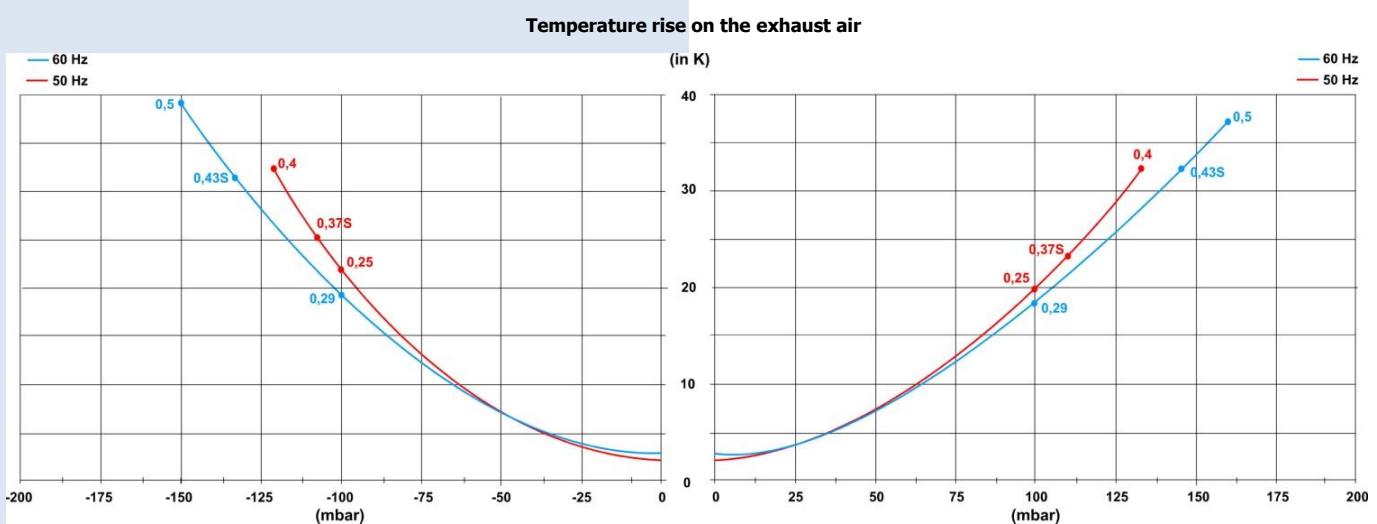

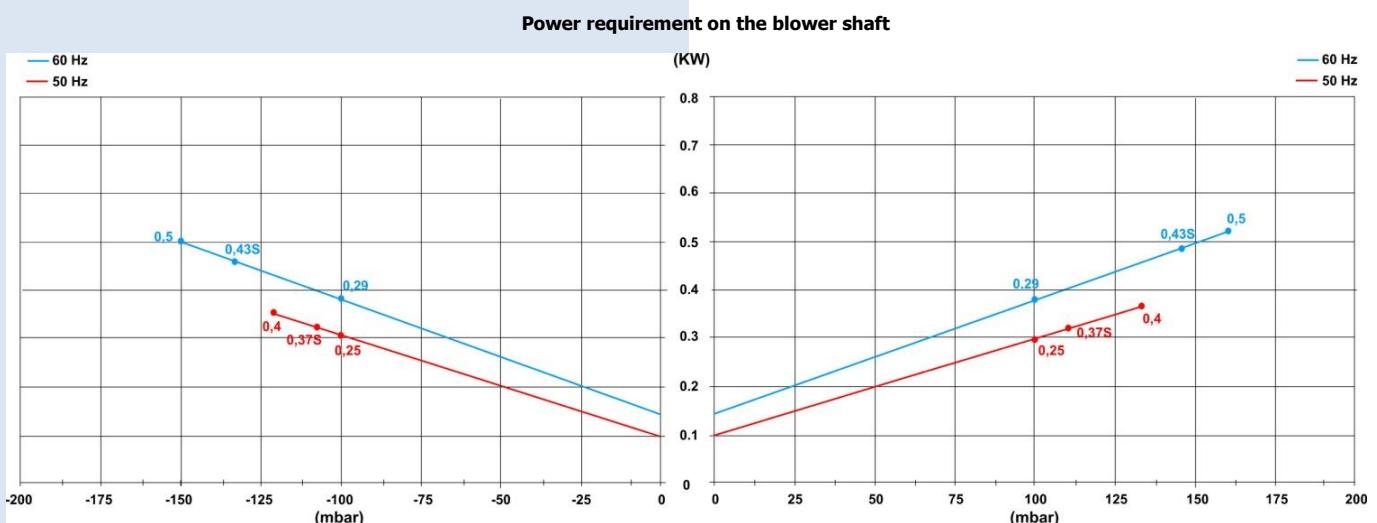

## Side channel blower single stage, TEFC

### Vacuum Operation

### Pressure Operation

Curves are valid for continuous operation; medium: air at 15°C, measured at inlet port and 1013 hPa (mbar abs.) atmospheric backpressure, Tolerance: ± 10%; ambient temperature: -25° to +40°C

Curves are valid for continuous operation; medium: air at 15°C, measured at inlet port and 1013 hPa (mbar abs.) atmospheric pressure, Tolerance: ± 10%; ambient temperature: -25° to +40°C

## Industry and Application

- Your distinct application
- Pneumatic Conveying Industry
- Electrical and Electronic
- Engineering
- Plastic Industry
- Material Handling
- Packaging
- Environmental Engineering
- Food & Beverage
- Printing & Paper
- Wood Working
- Textile
- Medical
