Pump

Technical specification : quality+ rigidity

Drop-Stitch Double PVC layer technology

Rigidity and robustness

By a high pressure pumping, the mesh consisting of thousands of polyester strong fibers fill the paddle board and create its strong rigidity. The double layer reinforce this rigidity.

Very useful for overweight or heavy persons.

Side Hook for Aqua-Elastic

You have 2 d-rings on the side to hook our aqua-elastic for more sport (optional equipment).

Fixing system

To make this activity easy to set, you have many D-rings on the front and the rear

Technical specification : comfort + safety

- **A non slip mat very safe**
a specific soft eva, non slip mat that covers the global surface of the mat, in order to offer you a large surface very safe for all your exercices.
- **Pedagogic Design**
with 3 resting zones and a central logo to keep one's balance and help the teaching

Technical specification : dimensions

Technical specifications

Matière : PVC reinforced

Finition : Technology Drop Stitch double pvc layer

Volume : 210 L

Weight on the mat : 120 kg

Weight of the product : 10 kg

Uses: Watfit, Yoga, pilates,

User: Beginner, advanced

Dimensions : 220 x 81 x 12 cm

A large surface to help beginners find their balance and to offer a great stability even for complex exercices.

International Training

The result of the expertise of several instructors in yoga, pilates and aquafitness, has led to create the Watfit program. It offers you the best of these 3 worlds. Efficiency, animation and coherence in the choreography are among the keys to this training with several level of difficulty. This training is strongly recommended in order to start the activity with success.
