

HP 3000 Premium

Models

Compact

Split

30.1 kW / 120 m³

WATER FLOW
From 8 to 12 m³/h

WATER EXCHANGER
Titanium of class Gr2 ASTM B338
with surface up to 1.4 m²
pressure drop max 5kPa

COVER
Metal galvanized
powder coated grates

COMPRESSOR
SANYO
scroll
quiet & energy class A+
microCOMPRESSOR+

SILENT BLOCKS
antiVIBRATION+

WATER CONNECTION
DN50 internal 6/4" thread

ACTIVE DEFROST
4-way valve grates

CONTROL PANEL
LCD display
AUTO mode
microECONOMY+
antiFREEZE+

AIR EXCHANGER
Gold fin epoxid
anti-corrosion
salt water resistant

REFILLING VALVE
Valve for refrigerant

AIR FAN
Axial air fan
protection fan grates

COP
up to **21.06**
at Air 26°C / Water
26°C / Humidity 80%

**Automatic
HEATING
COOLING**
included

**FULL YEAR
heating**
-15°C | +40°C

WIFI
control
possible

MICROWELL HP 3000 Premium is innovative pool water conditioning solution. It is a powerful heat pump suited for pools up to 120m³ in volume. With 30.1 kW capacity it is optimised for large pools, delivering continuous and stable production of water heating or cooling.

Designed on the principle of renewable energy source, MICROWELL HP 3000 Premium heats pool water at the shortest time in the lowest operational costs; all a result of superior Microwell technology.

STANDARD EQUIPMENT:

- MICROWELL HP heat pump
- Circulation pump control
- microCOMPRESSOR+
- microECONOMY+
- User manual

ACCESSORIES:

- Winter module
- Heat exchanger frost protection
- Condensate tray defrost
- Protection cover
- Hydro kit
- Control panel placement
- Split model connection length
- Smart WIFI control

Microwell reserves the right to change the technical data without notice.

MICROWELL HP range of swimming pool heat pumps is a full capacity range operating on the principle of renewable energy, designed for continuous and stable production of water heating or cooling in any pool environment. Their exceptional efficiency, low environment impact and low costs are the result of superior technology, putting them at the industry's forefront.

Now, the novelty is launching into the market - HP INVENTOR, with great new features.

INCREDIBLE EFFICIENCY OF HP RANGE

Efficiency of Microwell heat pumps is proven to be the best. Designed to reach the top results, they are able to extract heat or cold present in ambient environment and leverage it into the pool water. While heating, higher the ambient air temperature is, the more free energy can the heat pump extract operating with high efficiency. At favourable conditions users of Microwell heat pumps pay less than 15% of heat meaning 85% of the heat is free.

- At lowest cost possible
- In shortest possible time
- With lowest noise possible

microECONOMY+

Microwell heat pumps are designed to produce the highest energy yield by carefully planned operational rhythm of a circulation pump. microECONOMY+ is a technology of the most economy circulation pump control. Microwell swimming pool heat pump with microECONOMY+ ensures heating of your pool sooner and cheaper than any other swimming pool heat pump.

Market's most efficient swimming pool heating solution.

HP COMPACT vs HP SPLIT

COMPACT heat pump is one device, that provides desired water temperature in the pool.

It requires only water connection, power supply and convenient place to be installed. Simple and affordable system.

Microwell **SPLIT** heat pump system was designed to combine all positives of a swimming pool heat pump and to eliminate all negatives. By delivering renewable energy and low energy pool water conditioning, Microwell Split heat pumps are heating warm water all year long at low cost and without any acoustic or visual disturbance. They are ideal solution for outdoor as well as indoor pools.

AUTOMATIC HEATING / COOLING

Designed to reach the top results, they are able to change the mode fluently from heating to cooling, or other way round. It depends on the setting of the required pool temperature.
