

Reduce your chlorine consumption!

MiniMaster

pH and chlorine. MiniMaster measuring unit offers you continuous monitoring and automatic dosing (disinfection) to safeguard water quality in the same way as in public baths and large hotel pools. With a MiniMaster installed in your pool, you need never again worry about your water quality – The MiniMaster handles it all automatically.

Suits all types of pools

MiniMaster is available in several versions to suit all pool types. The most advanced version of MiniMaster does virtually the whole job for you. A MiniMaster equipped with all the options is a complete measuring and dosing unit. The water's pH level is measured with the help of pH electrodes and chlorine levels are checked using a chlorine electrode. Clear and easy-to-see LEDs show the status of your water quality.

Technical data

	pH/Chlorine	Chlorine	pH
Power consumption excl. dosing equipment	4W	2W	2W
Power consumption dosing equipment (max)	2X 100W	100W	100W
Rated current	1A		
Rated current	220-240 1~N 50/60Hz		
Temperature range	0 to +45°C		
Sealing class	IP44		

Pahlén cares about the future.
Symbolizes our green products with long-term sustainable environmental and energy technology

Measures and doses chemicals automatically. Provides optimal water quality with automatic monitoring.

Features

- Digital control panel
- Flow meter
- Pre filter
- Tilttable flow cell module
- Transparent flow cell
- Drain tap
- Automatic measurement of water quality
- Operates dosing equipment for chlorine and pH

MiniMaster-kit

Item no.

- 33034 MiniMaster-package Chlorine & CO₂ complete kit with MiniMaster, electrode kit, dosing pump, saddle clamp and collecting vessel.
- 33033 MiniMaster-package Chlorine & acid complete kit with MiniMaster, electrode kit, dosing pump, saddle clamp and collecting vessel.
