Seljuk Star

As a result of the interaction of beliefs and cultures from past to present, the Seljuk Star, which is one of the special symbols passed down from generation to generation, consists of two squares perpendicular to each other. One of these squares represents the material world, and the other one represents spirituality.

Each corner of the Seljuk star symbolizes a different virtue: Compassion, modesty, patience, truthfulness, keeping secret, loyalty, generosity and gratitude.

Another meaning of the octagonal star is victory. The eight-pointed star, which expresses cardinal and intercardinal points, heralds to win the victory anytime, anywhere.
